Through tours, events, and publications, M&G seeks to partner with educators in fulfilling all of the National Visual Arts Content Standards. By integrating art into the core curriculum, M&G's goals are to teach children to value the arts, to communicate through the arts, to become creative problem solvers *through the inclusion of STEAM-related concepts and fully developed STEAM units*, to understand history and culture in light of the arts, to critique the arts, and to develop an aesthetic awareness in the arts. By fulfilling this mission, M&G is able to help develop citizens who have the ability to think, feel, and understand the world in which they live.
